

ROBO CLEAN MULTI-STATION ULTRASONIC WASHING SYSTEMS WITH ROBOTIC CONTROL

**ULTRASONIC
WASHER**

**SPECIAL
DESIGN**

**ROBOTIC
CONTROL**

**AUTOMATION
CONTROL**

APPLICABLE PROCESSES

- Pre-Wash
- Washing
- Ultrasonic Washing
- Rinsing
- Phosphating
- Passivation
- Lubrication
- Drying
- Loading
- Unloading

WORKING PRINCIPLE

Robot Automated Ultrasonic Washing Systems provide full automation in industrial washing, process is done quickly and without the need of operator. It guarantees the same quality cleaning criteria of the parts coming from the mass production at any time without any operator error. Multi-station PLC controlled Robot Transport Ultrasonic Washing Systems are used for mass production washing, painting, coating, and pre-assembly washing and surface cleaning.
